Issued for Information of Producers
Who Are Not Members of Cooperative Associations

Vol. V, No. 11

November 1961

OCTOBER UNIFORM PRICE \$4.12

Dairy farmers will receive a uniform price of \$4.12 for October 1961 deliveries of Grade A milk to handlers under the South Bend-LaPorte-Elkhart, Indiana, milk order. The uniform price is based upon a butterfat test of 3.5 percent, and will be adjusted by a differential of 7.3 cents for each one tenth percent that tests vary above or below the 3.5 percent standard. This minimum price is subject to a 4 cent per hundredweight marketing service deduction, together with the authorized hauling charge.

PRODUCER RECEIPTS

A sharp increase occurred during October in producer receipts. There was a 14 percent increase in daily production and a 50% per day increase for each producer on the market. In comparing this production with the production a year ago, it is found that on a daily herd basis, it is 46 pounds more per producer than it was in October of 1960. Utilization of producer receipts in Class I was down because of the sudden increase in receipts with not enough sales to compensate for the increase.

CLASS I SALES

There has been a firm increase in Class I sales over the previous month, which indicates that sales may be better this fall than in the past year. A year ago, there was a 4 percent decrease in Class I sales from September, while this year there is a 7.7 percent increase over September. Even with this increase, producer receipts are moving up faster, which accounts for a 73 percent Class I utilization, as compared with 75 percent a year ago.

BULK TANK STATISTICS

September 1961 monthly statistics show that 91.4 percent of the producers were bulk tank producers. The bulk tank producers delivered 94.9 percent of the total producer receipts. When we compare September 1961 with March 1961, which was a month in which the number of producers was comparable to September, the percentages are 87.8 by number and 92.6 by volume.

CLASS I PRICE

The Class I price for the November 1961 delivery period will be \$4.51 per hundredweight for 3.5 percent milk. This price was computed by adding \$1.30 per hundredweight to the average condensery pay price (\$3.19) and adding the 2 cent supply-demand adjustment. The supply-demand adjustment for the December 1961 delivery period will be a minus 2 cents.
